Art Unit: 1731

Claims 1-10 are generic to a plurality of disclosed patentably distinct species comprising species I to XVI and IA to XVIA (claim 1). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Applicant's attorney, Mr. Hall, on June 7, 2001 a provisional election was made with traverse to prosecute the species VIII, e.g. the species of Example 18 drawn to: (N,N,N',N'-Tetramethyl-N,N'-bis-[3-(1-oxyl-2,2,6,6-tetramethylpiperidin-4-yloxy)-propyl]-hexamethylenediammonium Dibromide. Affirmation of this election must be made by applicant in replying to this Office action. All the claims are generic to the species of claim 1.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1731

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-10 are rejected under 35 U.S.C. 102((a) or (e)) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO 99/05108.

See Page 55, Example (g) for (N,N,N',N'-Tetramethyl-N,N'-bis-[3-(1-oxyl-2,2,6,6-tetramethylpiperidin-4-yloxy)-propyl]-hexamethylenediammonium Dibromide. This is the same compound as the elected species. See Example 1 and Abstract, for using 0.5 to 0.1% of the elected species for preventing loss of brightness and for enhancing resistance to yellowing of a lignin containing pulp, e.g. chemimechanical and thermomechanical. See Abstract for adding UV absorbers and polymeric inhibitors and metal chelating agents as coadditives. Any difference would have been an obvious modification of WO 99/05108.
